Testing, testing, just some standard Latin script options: língua portuguesa, português

Here is some Ethiopic (the defined fallback should switch to Amharic without extra coding in this source text): አማርኛ

And this is Russian (since cyrillic is already in NotoSans by default, no fallback is defined to handle this): рýсский язы́к

Here is Amenian (with NotoSansArmenian):

And here is some Arabic (using NotoNaskhArabic): ‏

The end.
